History

Adiyaman University, Vocational School, Department of Handicrafts, Architectural and Decorative Arts Program was established in 1997. Our department is a two (2) year higher education program that aims to train qualified intermediate manpower who can take part in the production-application processes of institutions related to Architectural decoration and Decorative field and assist the management or open and run a business on their own behalf.

Mission & Vision

Mission

In our changing and developing world, qualified artistic staff who can produce solutions to problems under the guidance of educational staff who have the knowledge, experience and infrastructure required by our century, have national values, carry the importance of aesthetic and artistic concepts, and who will contribute to the Turkish industry in the constantly developing decorative material and product manufacturing in our country, will have professional knowledge and skills. To train qualified intermediate manpower who has experience, can use automation programs, can follow developments closely, is open to continuous developments and is aware of business ethics.

Vision

To train intermediate staff who follow the agenda, are knowledgeable, innovative, active and have high technical knowledge.

Program Profile

In the Architectural and Decorative Arts Program, training is provided to train intermediate manpower to work in businesses. Technical personnel are trained to have the necessary skills in production in industry, private and legal workshops, to acquire work habits that will increase the efficiency of production in the environment in which they work, to establish business, human and production relations, and to acquire design habits in line with innovations in the field of art and technology.

Graduates of the Architectural and Decorative Arts Program also work in interior and exterior architectural wall decoration areas, ceramic and sculpture art workshops, stained glass and plaster mold casting units. Students who successfully complete their education are given the title of "Architectural Decorative Arts Technician". They work as intermediate staff in public and private organizations.

Having knowledge about conceptual and practical management and its sub-branches in the field of Handicrafts and the skills to use this information (defining, evaluating, interpreting, analyzing and producing solutions), taking responsibility, being able to work independently, and having sufficient awareness about social rights, justice and cultural values. To train technician candidates who act in accordance with social, cultural, scientific and ethical values and who are sensitive to social problems.
